

## **Our Mission**

MIS **inspires, challenges, and empowers** students to become:

- Bold dreamers who shape their own future and turn their aspirations into reality.
- Resilient, adaptable individuals who embrace challenges and persevere.
- Culturally respectful contributors who make a positive impact.
- Engaged community members who foster belonging and take pride in their school.

## **Strategic Priorities 2025-26**

### **Strengthen Teaching, Learning, & Academic Excellence**

This year, we're focused on further strengthening teaching and learning across every grade. Our goal is for every student to make measurable progress towards ambitious, personalised goals - supported by excellent teaching, meaningful challenge, and high academic standards. Data and technology will be used to assess progress, personalise learning, and ensure every student is both supported and stretched.

### **Ensuring Financial Sustainability & Resilience**

In our 60th year, we're laying the foundation for MIS's future - building resilience through smart financial planning, investing strategically in our people and campus, and ensuring the school can navigate future challenges with confidence while sustaining excellence for the next decade and beyond.

### **Build Organisational Capability & Leadership Continuity**

We're focused on building leadership strength and alignment across all areas of the school and ensuring a smooth Head of School transition. By developing data-informed decision-making, empowering teams, and investing in our people and processes, we're building the leadership capability, systems, and culture to deliver on our ambitions - now and in the future.
